

Confidential

12. (New) An electrical socket according to claim 2, wherein said retaining structure includes a ring at each end of the socket, and wherein said wires are retained in groups by attachment to said rings at opposite ends of the socket.

A.D.

13. (New) An electrical socket according to claim 3, wherein said retaining structure includes a ring at each end of the socket, and wherein said wires are retained in groups by attachment to said rings at opposite ends of the socket.

R E M A R K S

The claims have been amended to eliminate multiple dependency and to improve their format. None of these amendments is believed to involve any new matter. Accordingly, it is respectfully requested that the foregoing amendments be entered, that the application as so amended receive an examination on the merits, and that the claims as now presented receive an early allowance.

Respectfully submitted,
